

1 VI. CLAIMS

2  
3 What is claimed is:

4  
5 1. A window assembly for garage doors, comprising:

6  
7 A) a transparent panel having an external surface and an internal  
8 surface, said external surface including a peripheral flange  
9 member making said external surface larger than said internal  
10 surface with respective peripheral edges, and said peripheral  
11 flange member further including a peripheral underside  
12 surface that comes in abutting contact against the peripheral  
13 external surface adjacent to an opening in a garage panel with  
14 cooperative dimensions to permit said internal surface to go  
15 through; and

16  
17 B) means for mounting said transparent panel on said garage  
18 panel.

19  
20 2. The window assembly set forth in claim 1 wherein said means  
21 for mounting said transparent panel on said garage panel includes an  
22 external frame assembly and an internal frame assembly, both  
23 mounted on said garage panel sandwiching said peripheral edges.

24  
25 3. The window assembly set forth in claim 2 wherein said means  
26 for mounting said transparent panel on said garage panel includes  
27 fastening means for securing said internal and external frame  
28 members to said garage panel.
